Plesk

Customer

Websites & Domains

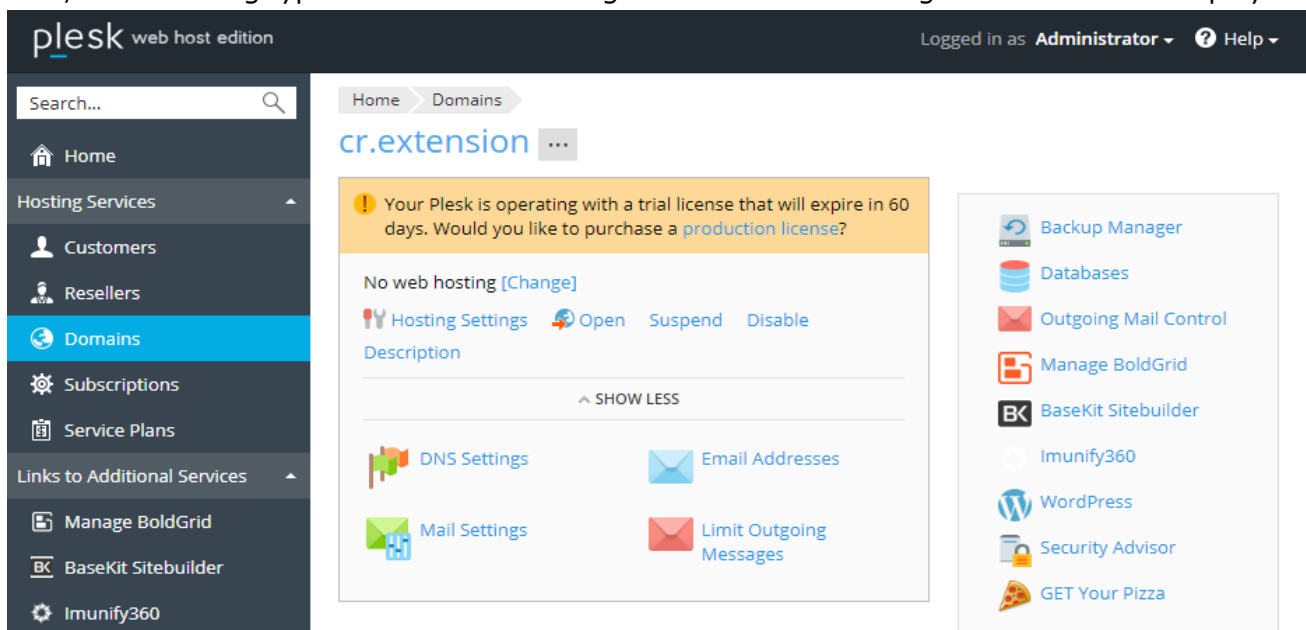

When Crayon Extension is installed, an icon is displayed on the Website & Domains page.

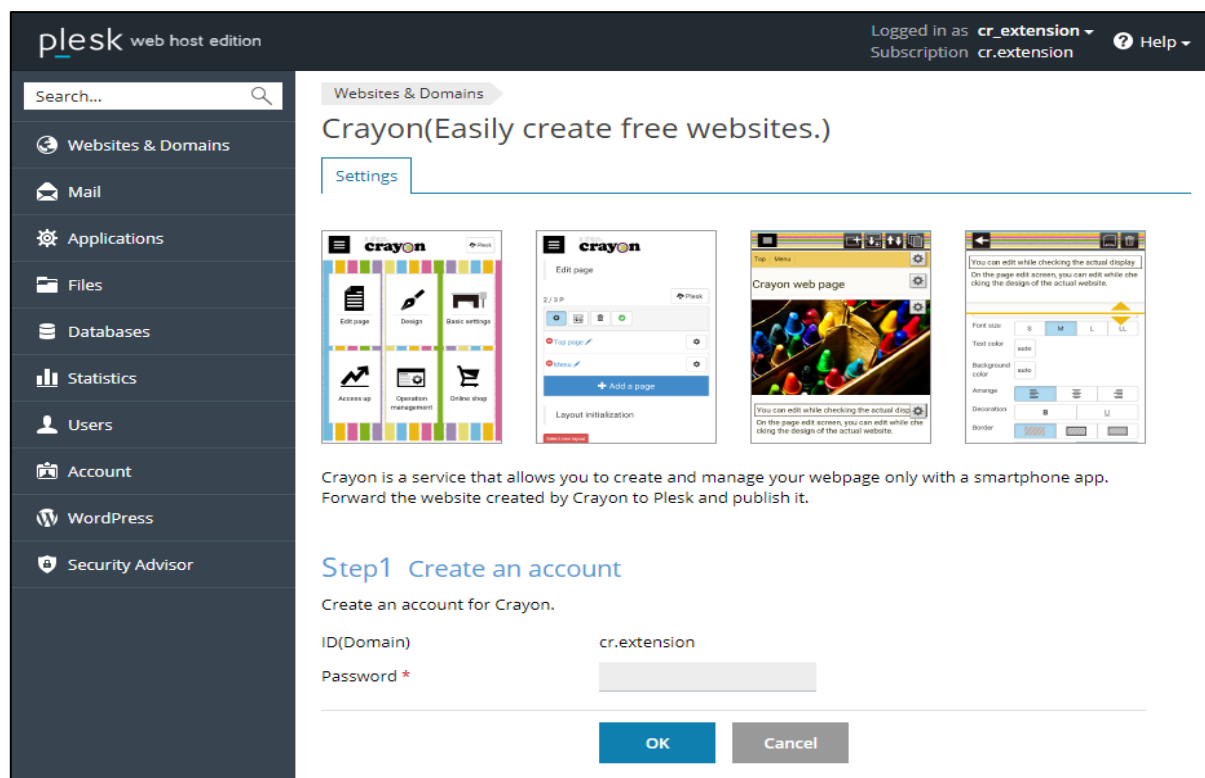

By clicking on the icon, you can go to the setting screen of crayon and create accounts and change the passwords.

Since domain and subdomain can only be used as login ID, icon is not displayed in domain alias.

Also, if the hosting type is set to "Forwarding" then "No web hosting" icon will not be displayed.

Settings

On the setting screen create an account to use crayons.

By creating an account, you can log in to crayons and publish the homepage created from the application on Plesk.

Step1

Use the domain name or subdomain name as the login ID and set the password.

Password

- Set with 6 to 16 letters
- Alphanumeric characters that can be used
- Blank, less than 6 characters, 17 or more characters, symbols and other half-width alphanumeric input errors

For domains that have been upgraded on the Go to Extension page, accounts will be created as paid plan domains.

After creating the account, the password setting field will be hidden and only the login ID (domain name) will be displayed.

Step1 Create an account

You've already created an account.

ID(Domain): cr.extension

Step2 Install app

Download on the App Store | GET IT ON Google Play

Step3 Log in to Crayon

Launch the app and select "Login with Plesk" from "Log in with your account". Log in with the account that you have created with Step1, and start creating your website.

Step4 Publish website with Plesk

Make your website with Crayon, then forward it to Plesk in order to publish it.

plesk.com | Suggest an Idea

Step2

Store link and QR code are displayed to install crayon's app.

If you read the displayed QR code, you can go to the App Store from iPhone, Google Play from Android to download the crayon application.

Step3

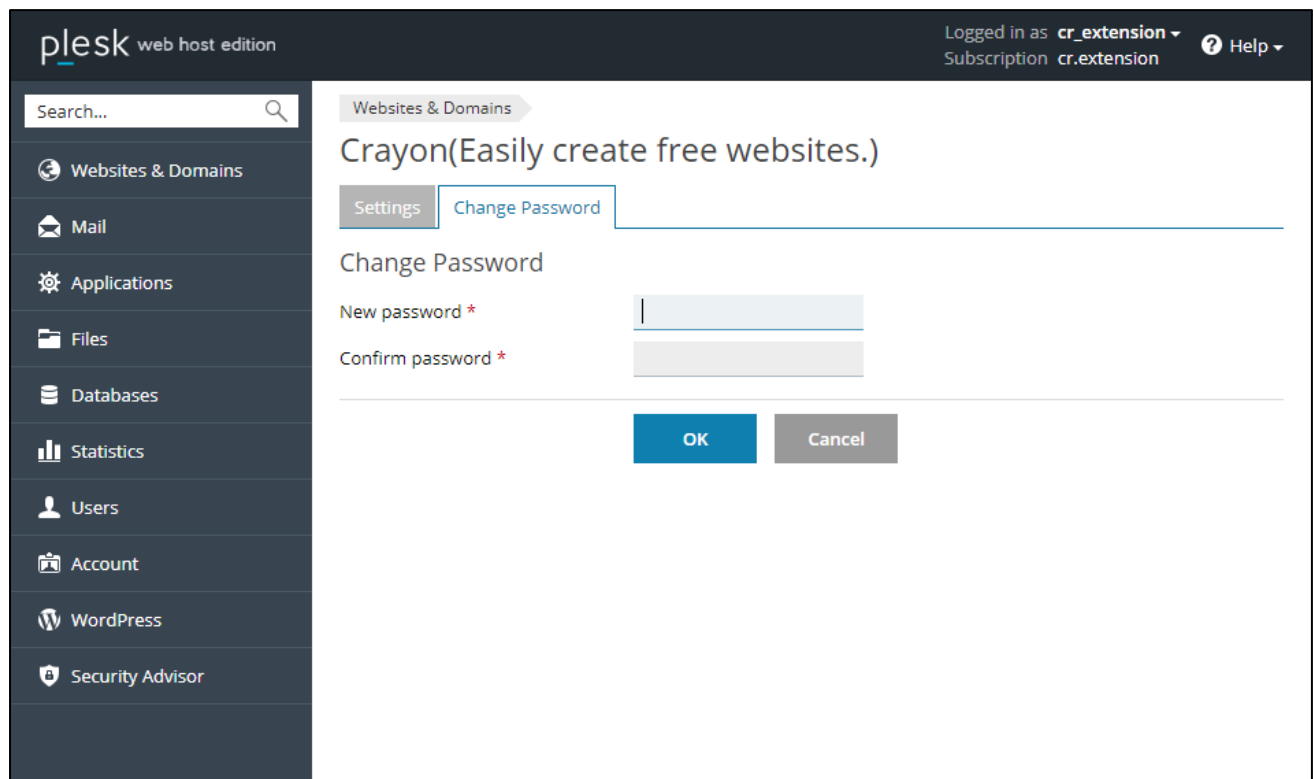

After launching the application downloaded you can logging in with using login ID(domain) according to step2 and password registered in Step1. Then you can start creating the homepage with crayons.

Step4

You can transfer the created homepage with crayons from the Plesk button in the crayon application.

If the communication is successful, the homepage will be released.

Change Password

The screenshot shows the Plesk web host edition interface. The top header includes the Plesk logo, 'web host edition', and user information: 'Logged in as cr_extension' and 'Subscription cr.extension'. A search bar is on the left. The main navigation menu on the left lists: Websites & Domains, Mail, Applications, Files, Databases, Statistics, Users, Account, WordPress, and Security Advisor. The main content area is titled 'Websites & Domains' and features a sub-header 'Crayon(Easily create free websites.)'. Below this, there are two tabs: 'Settings' and 'Change Password'. The 'Change Password' tab is active, showing a 'Change Password' section with two input fields: 'New password *' and 'Confirm password *'. At the bottom of this section are 'OK' and 'Cancel' buttons.

On the password change screen, you can change the password for logging in to crayons. Once you create an account it will be displayed and ready to use.

Password

- Set with 6 to 16 letters
- Alphanumeric characters that can be used
- Blank, less than 6 characters, 17 or more characters, symbols and other half-width alphanumeric input errors
- If the values entered in the password entry field and the confirmation field do not match, an error

Admin

Go To Extension

The screenshot shows the Plesk web host edition interface. The top navigation bar includes the Plesk logo, 'web host edition', and a user status 'Logged in as Administrator' with a help icon. The left sidebar contains a search bar and a list of navigation items: Home, Hosting Services (Customers, Resellers, Domains, Subscriptions, Service Plans), Links to Additional Services (Manage BoldGrid, BaseKit Sitebuilder, Imunify360, Security Advisor, REVE Chat, UNLOQ), Server Management (Tools & Settings, Extensions, Docker), and a Docker icon at the bottom. The main content area is titled 'Crayon' and shows a warning banner about a trial license expiring in 60 days. Below the banner, it states 'You can check the current status of use by each domain. The status shows [Crayon icon] for the domain using Crayon.' and 'Type of licence : Free trial'. There is a link 'Obtain a license' and buttons 'Upgrade' and 'Delete'. A table lists 15 items total, showing domain names, status (Crayon icon), setup dates (all Aug 8, 2018), and upgrade dates. The table has columns for Domain name, Status, Setup Date, and Upgrade Date. The domains listed are: teste.dis.test, sub.account.test, testd.dis.test, host.test, del.testE, testc.assyu.test, pass.test, testa.pass.test, testb.pass.test, and testa.log.test.

Domain name	Status	Setup Date	Upgrade Date
teste.dis.test	[Crayon icon]	Aug 8, 2018	
sub.account.test	[Crayon icon]	Aug 8, 2018	
testd.dis.test	[Crayon icon]	Aug 8, 2018	
host.test	[Crayon icon]	Aug 8, 2018	
del.testE	[Crayon icon]	Aug 8, 2018	
testc.assyu.test	[Crayon icon]	Aug 8, 2018	
pass.test			
testa.pass.test			
testb.pass.test			
testa.log.test			

In Go To Extension, domains and subdomains are displayed as a list, and you can check the domains using crayons. Domain aliases can not be used as login IDs and therefore will not appear in the list

When you click the link of Obtain a license, it will transition to the license purchase screen.

This link is displayed when the license is not installed.

Type of license shows the currently installed license.

When the license is installed, the Upgrade button becomes available and then you can upload the selected domain to the pay plan.

The maximum number of domains that can be upgraded will depend on the installed license.

Upgraded domains will show the date you upgraded in the Upgrade Date field.

If a domain that does not use Crayon is selected and upgraded, a Crayon account will be created as the account using paying plan at setting.

You can also delete the Crayon account or Upgrade reservation by selecting the domain and pressing the Delete button.

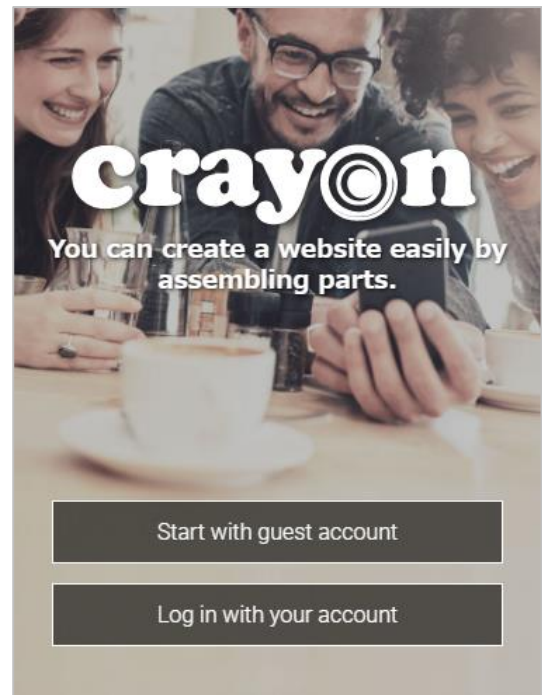

Icons are displayed in "Status" and "Account creation date" on set up date in the domain where account is already created.

Click on the domain name link to go to the Websites & Domains page.

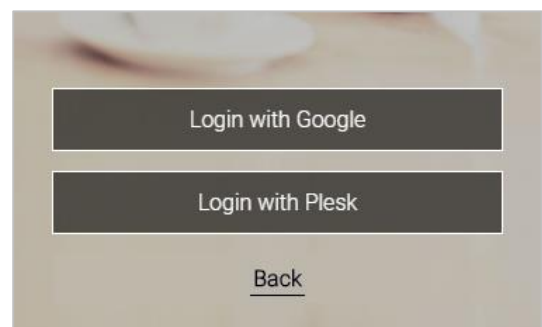

Crayon

Login

Click on "Log in with your account".

Click on "Login with Plesk".

Enter the ID (domain), Password and click on "Sign in".

Login with Plesk

Enter your Plesk Extension account created by Crayon.

Select Initial Layout

Select the initial layout here.

Please select the image you like.

Initial layout

Beauty / Esthetic

- Top page
- Service menu / staff introduction

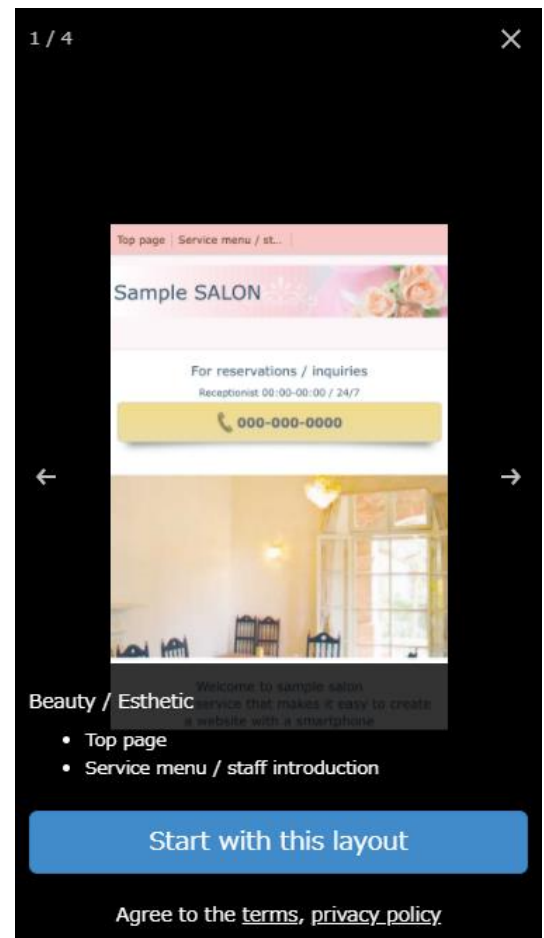

Shop

- TOP
- SHOP INFO

It switches to the preview screen.

You can switch to another initial layout by sliding left and right arrows.

When selected the initial layout to use, please click on "Start with this layout".

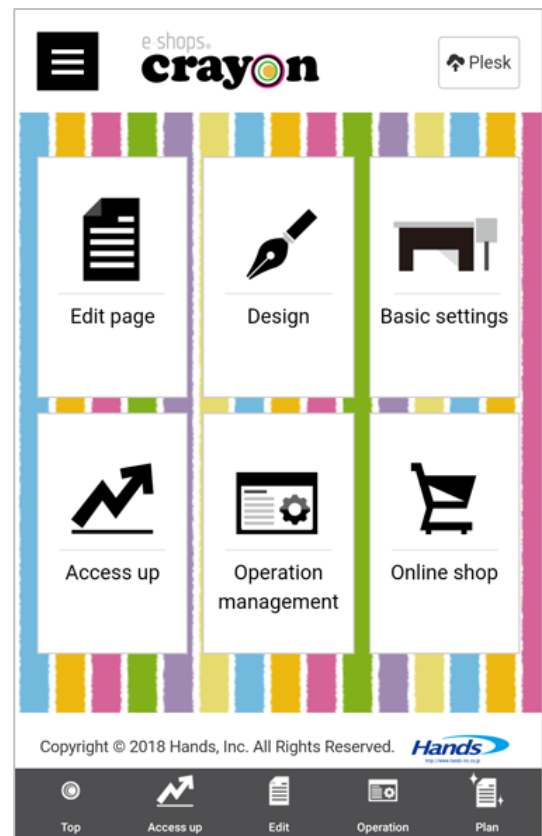

TOP

The Top has six buttons.

1. Edit page
2. Design
3. Basic settings
4. Access Up
5. Operation management
6. Online shop

Press the upper left button to open the side menu.

The button on the upper right is the upload button.
You can use it when uploading the homepage.
(There is a similar button in the Edit page.)

Basically, the menu below is always displayed.

1. Top
2. Access up
3. Edit
4. Operation
5. Plan

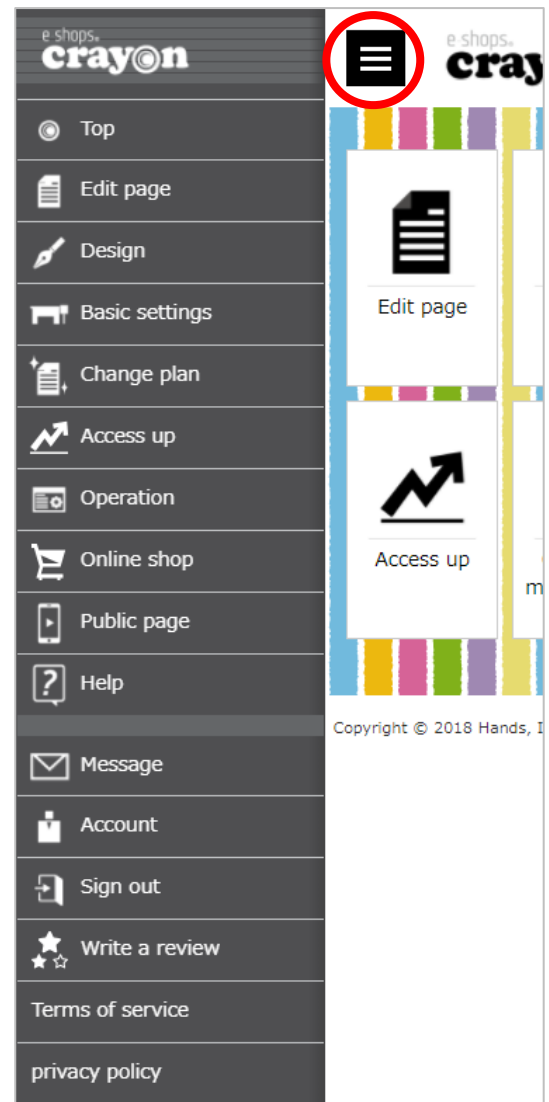

To display the Top screen, select Top from the left menu and click on the top of the bottom menu.

Side Menu

There are 16 items in the side menu.

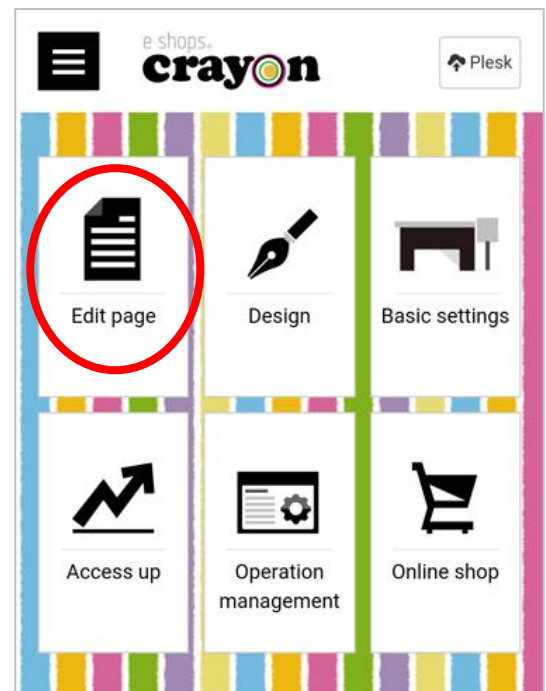

1. Top
2. Edit page
3. Design
4. Basic settings
5. Change plan
6. Access up
7. Operation
8. Online shop
9. Public page
10. Help
11. Message
12. Account
13. Sign out
14. Write a review
15. Terms of service
16. Privacy policy

You can close the menu by clicking the right side.

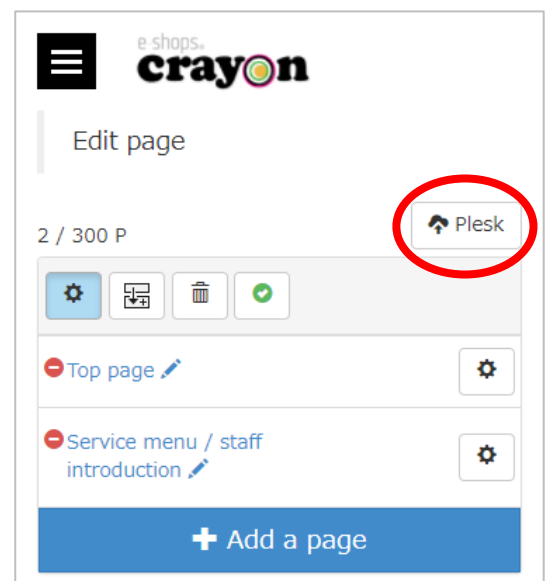

HTML Upload

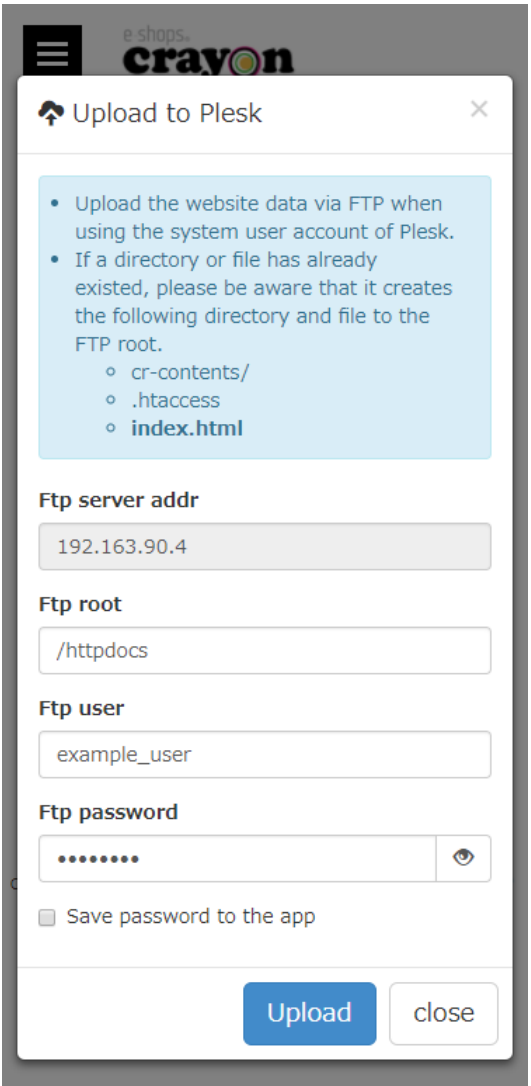

Click on "Edit page".

Click on "Plesk".

Enter the FTP information of the server and press the "Upload" button.

The screenshot shows a dialog box titled "Upload to Plesk" with a close button (X) in the top right corner. Inside the dialog, there is a light blue box containing instructions:

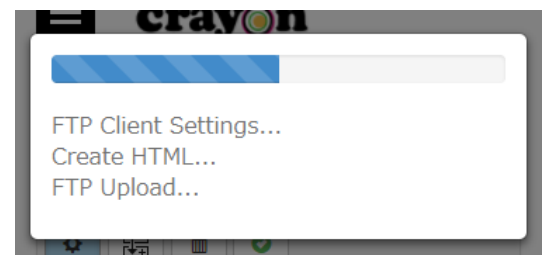

- Upload the website data via FTP when using the system user account of Plesk.
- If a directory or file has already existed, please be aware that it creates the following directory and file to the FTP root.
 - cr-contents/
 - .htaccess
 - index.html

Below the instructions are four input fields:

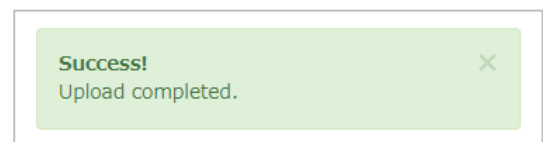

- Ftp server addr**: A text box containing "192.163.90.4".
- Ftp root**: A text box containing "/httpdocs".
- Ftp user**: A text box containing "example_user".
- Ftp password**: A password field with masked characters "....." and a toggle icon (eye) on the right.

Below the password field is a checkbox labeled "Save password to the app". At the bottom right of the dialog are two buttons: "Upload" (blue) and "close" (white).

Start Upload.

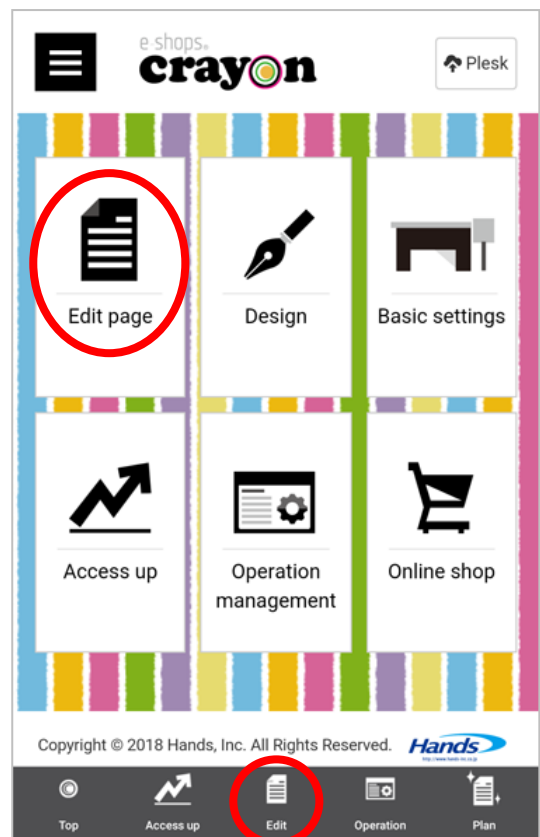

"Success" is displayed when upload is completed.

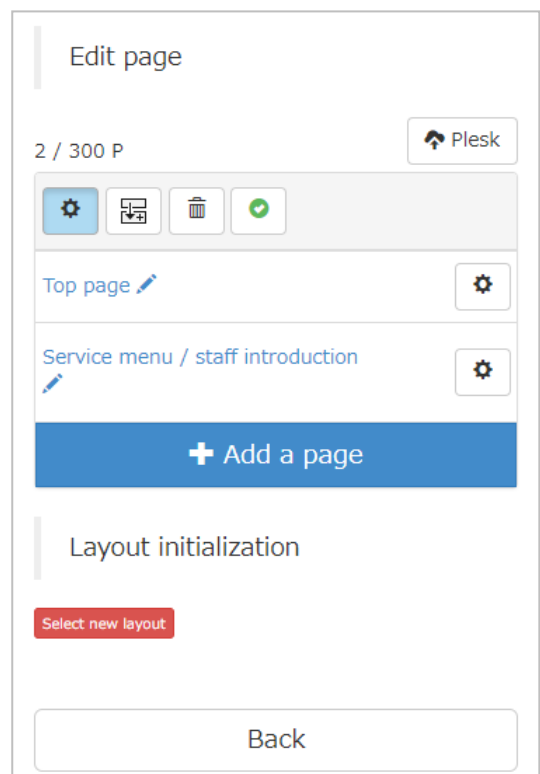

Edit page

Click on the "Edit page" from the Top, or the lower menu "Edit" or the side menu "Edit page".

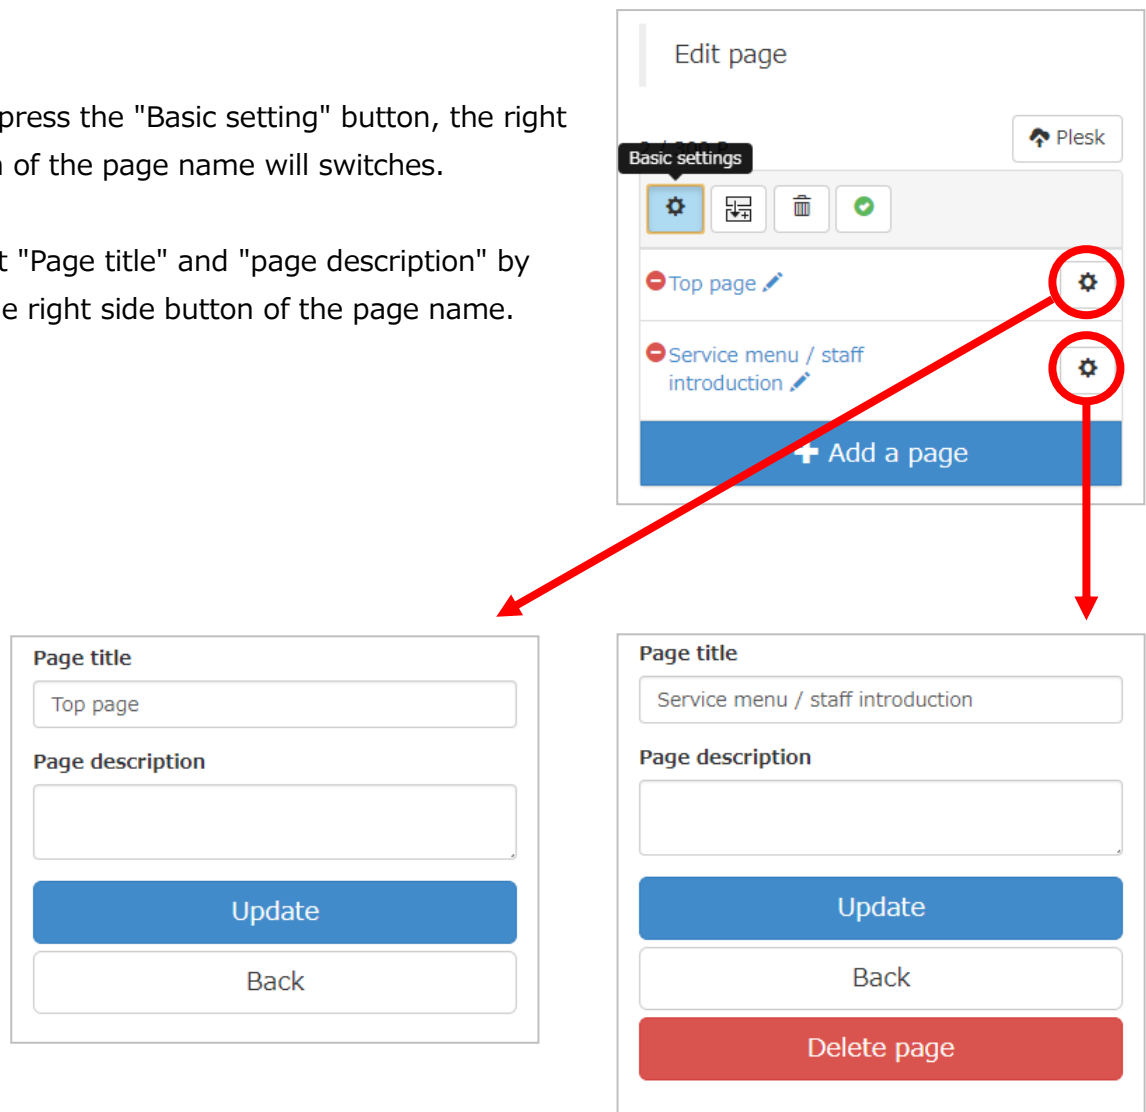

The page list is displayed.

Here you can perform operations on the page

When you press the "Basic setting" button, the right side button of the page name will switch.

You can set "Page title" and "page description" by pressing the right side button of the page name.

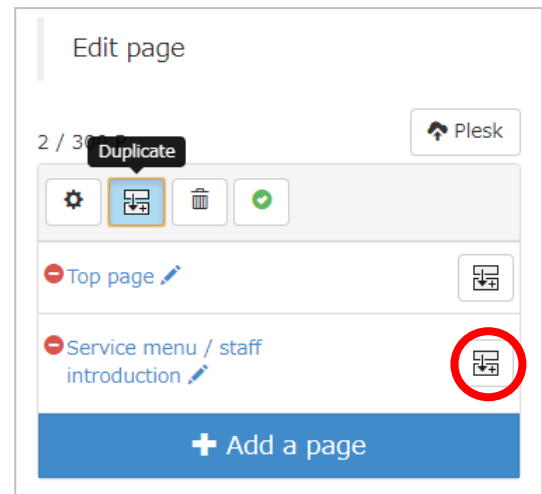

Press "Update" to save and return to the list page.
Press "Back" to return to the list page without saving.

Here there is "Delete page" icon also. So if you want, you can use it to delete the page.

Pressing the "Duplicate" button will switch the button of right to the page name.

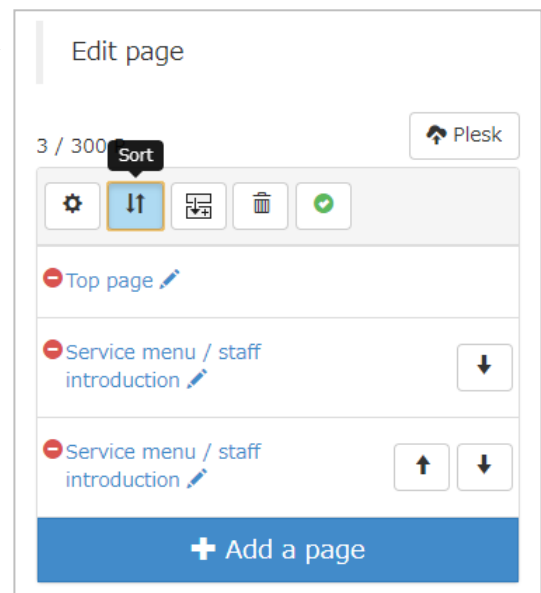

Press the switched button in right side of the page name for duplicate the page.

When the number of pages becomes 3 pages or more, "Sort" button will come up.

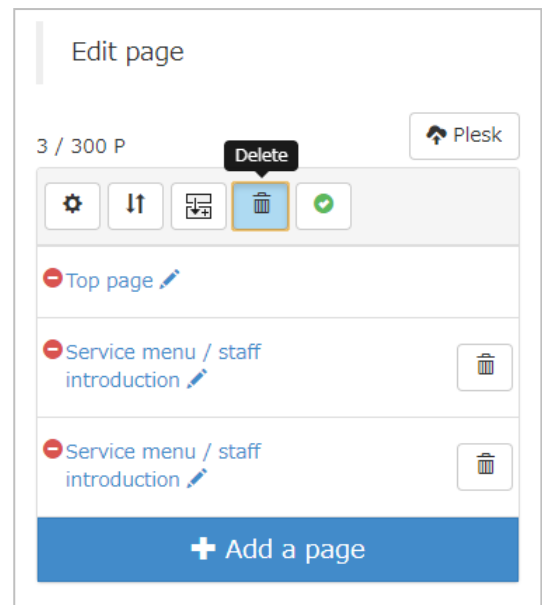

When you press the "Sort" button, the right side button of the page name switches to the up and down arrow.

You can change the order of pages by pressing the arrow buttons.
